Required for college

If you are considering taking a class that uses this book, don't. I love reading. I can read almost anything and enjoy it, even text books. There are some excellent text books out there. This one is just plain boring. It's completely dry, like reading a fact sheet.

The book was just as described that I needed for my class.

interesting boom to read as a nurse.

Perfect

very informative.

Probably the first medical book I've ever read, very impressed.
