Zion National Park: Bryce And Zion

Synopsis

Parks Toured Zion excels in having a duet of deep canyons coupled with 2,000 foot (609 m) lofty, chiseled, colorful, vertical cliff walls. Therefore, its majestic scenery is seen by looking upward at those cliffs that are further embellished by a vast palette of colors. All were created by the Virgin River. Zion annually hosts over 3,000,000 visitors each year surpassed by only Grand Canyon. A remote area of Zion has petrified wood. Kolob Canyon host the world's second largest standing arch and one of the most prized hiking canyons - Subway. Book Tour Content Our book is a combination of driving, walking, mountain biking and other tours such as rafting and horseback riding. There are suggestions of what to see and do, for each tour. We also identify free dry-camp (no facilities) sites to reduce travel expense. This book can be read on any desktop PC, Mac or Pad by downloading an application from .com. In 1848, when the Mormons arrived from eastern U.S. and England, Utah belonged to the Mexican government who inherited from Spain by revolution. It was raw land. After a war with Mexico, the land became U.S. property. That lured more eastern pioneers from gold prospectors and outlaws to vast herds of cattle ranchers. We have captured this fascinating history and blended it into each of our tours. Planning Your Vacation/Holiday A well-planned vacation/holiday insures pleasant memories and that no day is wasted. There are approximately 125 pages in this E-book that incorporates the latest computer technology by extensive use of external Internet references. There are over 100 web sites, 30 video sites and 60 photographs for you to visualize. These external references provide additional touring information where you can visually see the hiking or bicycling trails. You can plan your trip at home to include driving tours, hiking, mountain biking and camping. Where applicable, we have included free camping areas. Appendixes provide additional trip information. Mile-By-Mile Location Your exact location is accomplished by using a meticulous identification of mileposts (posts along the road indicating mileage) located at each mile (1.6 km) on every improved road. Where those mileposts are not available, we use actual miles from a designated reference point. Where applicable, Global Positioning Satellite data (GPS) is supplied to complement walking tours in remote areas. Using this collection of information, you will always know your exact location.
