Roselyn Teukolsky has an M.S. degree from Cornell University and was a math and computer science teacher at Ithaca High School in Ithaca, New York for more than 30 years. She has taught physics, chemistry, biology, ecology, and oceanography. She has published articles in The Mathematics Teacher and in the National Council of Teachers of Mathematics Yearbook. She is the author of Barron's AP Computer Science review book and coauthor of Barron's SAT 2400: Aiming for the Perfect Score. She has received the Edyth May Sliffe Award for Distinguished Mathematics Teaching and the Alfred Kalfus Distinguished Coach Award from the New York State Math League (NYSML).

Could use more examples and practice tests. Fortunately this isn't the only study guide I ordered for my daughter. It is a decent book, don't get me wrong. I just think it's a good idea to have another study source as well.

Great

thanks you.

Great info

I would not recommend this book to anyone who scores less than 28 in these subjects. While I did find it helpful, I skipped over some of the material because the book doesn't really explain it very well and assumes that you know a lot (specifically in the math section).

I am a late in life ACT taker. So, unlike a kid straight out of high school I've had some time to really and truly forget all that useless stuff I learned. These workbooks are seriously saving me, not only from humiliating myself, but also from having to retake the ACT. It's like a nice mini refresher course in your hands. I have truly appreciated that these were available... Having them, being able to sit down and work through them is honestly taking away a lot of the test anxiety and boosting my confidence. So, if you're right out of high school or like me a late bloomer I highly recommend these!! I would also recommend looking into some specific workbooks for the different levels of math on the ACT. ie PreAlgebra, Alg I & II, Geometry and even touch on Trig. Happy Studying and Good Luck.

Thank you so much!!!

It was useful to me. Lots of drills, especially in the different types of science passages. Too much practices in Math section though.
