Customer Reviews

My students usually keep this text. This book is captivating to students as they report that it encourages them to think from various perspectives. It is not a "recipe" type book but it contains helpful text lists, assessments and reproducible materials. Angela J. Cox, Georgetown College

There are so many strategies available, the ones listed in the book are some of the major and successful strategies. The Instructional Focus helps to narrow down strategies to what the students want to build their lessons about. Grade Level Designation is very useful, allowing students to make sure they are using appropriate grade-level strategies. Deborah A. H. Williams, Wayne State University

The strategies are the essential ones I would expect and do use in my course. English Language Learner features are a critical component because few (if any) of my students have had any interaction with ELLs and need significant help understanding second language literacy. Charlotte L. Pass, SUNY Cortland

This is an excellent text for elementary teacher of Literacy. Strategies are explained clearly and simple enough for novice teachers. Examples are provided which provides additional support. I have also tailored the strategy for use with secondary students as well. Strategies are student centered and reflect best practices in the subject area. A plus for me is the step-by-step approach provided that makes for a quick read. Readers are provided with a rationale for each strategy and When to use! Strategies are also presented in alphabetical order-allows for quick search. A must have. This is my third purchase! Teachers would find it useful for the content areas as well.

I already thought I had learned all of the prominent literacy strategy, but I was pleasantly surprised
