Eileen Sorg lives just west of Seattle, Washington, with her husband, Scott, and the very best terrier ever, Scout. She created Two Dog Studio in 2000 after graduating from the University of Washington with a B.S. in wildlife science. Eileen uses her training in animal anatomy

and behavior to create precise and lively drawings that capture the extreme realism and character of her subjects. Working primarily with a mixed-media technique of colored pencil, watercolor, and ink, Eileen chooses from a wide array of subjects but always looks for a unique composition that sets her work apart from others. She uses photographs as references and spends much of her time creating custom artwork for her many clients. Eileen is an internationally award-winning artist and juror; she is a signature member of the Colored Pencil Society of America and a juried member of the International Guild of Realism and the Society of Animal Artists in New York. Her work is represented in several regional galleries and can be found on the web.

This colorful addition to the Drawing Made Easy series will teach you how to render a variety of nature scenes and landscapes in the fun and approachable medium of colored pencil. As accomplished artist Eileen Sorg guides you through the techniques and step-by-step projects, you will learn how to capture the beauty of the natural world by using colored pencils to create shadows, develop realistic textures, express time of day and mood, and more! Enjoy a range of scenes, from rolling hills and pretty fields to a beach scene and a night sky. Create complex colors combinations through layering and blending. Master the art of rendering realistic textures.

good book, explains how to use colored pencils.

These Walter Foster books are very good for beginner color pencil lessons. I have several and have been working my way through them. They give very good directions and have sketches for each picture that can be enlarged and copied to start you off ready to use the color. I don't have all the colors they recommend, especially the greys, but I can probably pick them up individually. I use Derwent pencils, Artist and Colorsoft. These books may be using Prismacolor or other brand; so at the beginning of each lesson I match the colors listed with my pencils' color grids and select the closest color I have to the one listed. I guess the good thing about that is that I have to really look at the colors and I am getting better at judging the warm/cool aspect and color matching.

A small book overall. Fonts are tiny and hard to read. Nice painting, but too small to appreciate. Describes the steps involved in each project, but only in respect to colors used, not the pencil techniques used which is an important part in learning. It does offer "artist's view on the painting project". It leaves room much to be desired.

This is just the book beginners need. Clear, concise and very understandable. The painting projects are perfect step by step understanding, and each one leads into another for proper coloring. I finished three of the pencil projects but used the colors I have and like so please don't worry about not having the authors colors just relax and use your own colors.

Just received and starting pencil art classes.

Though the book is small, it fits my needs very well. I enlarge the pictures, transfer them and follow the color guidelines. The relatively low price compensates for the size shortcomings. I do recommend it.

The book arrived quickly and was in great condition. It was for my wife who told me that it contained some very good tips for the drawing she does.

Great advise Good pictures . The book was as advertised AND on time
