Hawaii [Tubed] (National Geographic Reference Map)

Synopsis

One of National Geographic's most visually stunning maps, the Hawai'i Map shows all eight of the major islands and includes an inset of the entire chain of reefs stretching nearly 3,000 miles across the central Pacific. In addition to showing all of the major land features, the map also shows the Hawaiian Ridge that runs under the islands, providing a wonderful perspective on how they were formed. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:773,000 Sheet Size = 34.75" x 22.75"

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

A very good map, showing the mountains and the ocean depths in pseudo-3D nicely. Too small to show much detail on the individual islands, but excellent to give the overview of the whole island group. Especially if you appreciate the remarkable geology of this place.

This map is not laminated - does not show detail I was hoping for - Big Island is barely on the map.

This poster is my wall, and will remain for a while. It helped clarify the connections among several of the islands that we would see if sea level dropped--a good geologic addition to our trip to Hawaii. It would have rated a "5" in my estimation if it included Midway.

Arrived damaged in its flimsy tube. Otherwise a great map.

This hangs in my office at work. I get so many people who stop by to look, and inevitably they share their best memories of their favorite places to stay, eat, surf, hike, etc. It's the brightest spot in my office!

The tube is a very thin plastic tube that does not protect the paper wall map at all. My map came delivered completely bent and damaged, too damaged to frame and hang on the wall.

It's not a 3-D pop out style I was expecting. Good size map and flat.

Great print with a lot of detail.
