Seventy-two viewing sites where you can see more than 450 species of mammals, birds, fish, amphibians, and reptiles in New Hampshire.

This is a compact but information-filled guide to the wildlife of New Hampshire. Introduced with facts about tools, techniques, photography hints and ethics, the book continues with chapters on each of three regions of the state -- White Mtns and Northern, Uplands, Southern plains and hills -- each beginning with a color map showing the 20-30 viewing sites listed, followed by color drawings of various species and a page for each site which lists a description of the locale, viewing information, directions to the site, ownership, size, closest town and recreation and facility information. With lots

of colorful photographs and practical information, this invaluable book concludes with a species index. Terrific.

This book is an excellent purchase and I will recommend it whenever possible. The selection of information and details throughout the book is priceless to my husband and me. I purchased a used copy and it is in excellent condition. All aspects of my order from placing it to receiving it were above average in every way possible.

Great

Less of an identification guide - more of a list of places to go to see wildlife. I liked it well enough to keep it but it wasn't what I expected.
