ISBN-13: 978-1891327247

Product Dimensions: 6.8 x 0.2 x 9.1 inches

Shipping Weight: 5.1 ounces (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 7 customer reviews

Best Sellers Rank: #135,504 in Books (See Top 100 in Books) #41 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Forests & Trees](#) #111 in [Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology](#) #205 in [Books > Children's Books > Growing Up & Facts of Life > Health > Diseases](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Gr. 1-2. This entry in the We Both Read series offers glimpses of tropical rain forests in crisp, close-up images and side-by-side text for adult and child. Brief sentences and simple vocabulary introduce basic facts about the rain forest's climate, ecosystem, and animals on the right-hand page; on the left-hand page is additional information (there's no repetition) for more advanced readers. Young ones fascinated by the rain forest will find plenty of riveting color photos to help propel them through the text (a head-on shot of a growling jaguar is particularly stunning), although a map or other visual indicating where tropical rain forests are located around the globe would have been useful. An excellent title for beginning readers to share with adults and older siblings. Gillian Engberg

I like the book, but it's very dry for a first grader

Great book to read with your child - it has one page for the adult and one page for the child to read. My son is 7 and he loves this series.

Reading teacher recommended 'We can read' books, so I searched on to find them. They are great for kids that are hesitant to read. My 9 yr old loves the fact we can read together! She actually wants to read now!

Great "we read" book. Lots of facts and a good way to get reluctant readers, reading. They have to follow along with the parent reading parts so they can hear how to pronounce the harder words that are bonded and repeated in their side of the page...I really like this form and the content of their science related early reader books

This is a great rain forest book. It tells us about various animals that live in the rain forest such as marmosets, lemurs, and capybaras. It also tells us that some of the rain forest is being destroyed and that is not good. Many life saving plants can be found in the rain forest. This book tells us that it's important to take a stand against the deforestation. This book is one of the We Both Read series where more detailed reading is on the left side of the page for the parent to read and the child's page on the right has only two or three words in larger type. I would recommend this book for children and parents to read together. The full color photos of the rain forest animals are great. There is a lot to learn in this short book.

I decided to teach a rainforest theme in Kindergarten, what an awesome book, the kids love the pictures and can't wait to find out about the different animals. I generally read the child's side, (this is set up for adult and child) to the class so I do not lose them and they LOVE IT. I just wish I could find more for this age.

I have read several books in this series with my 4 year old daughter. She loves taking turns reading the pages. The books hold her attention much more than other beginning reader books that we have found.
