A collection of recipes for diabetics who are trying to control what foods they eat. This book has some really good recipes in it. A number of the recipes have sections with suggestions on how the recipe can be made ahead or stored for future use. This is a great help for busy cooks who don't have a lot of time in the kitchen. I will be using it again.

These recipes sound wonderful. I am going to try a lot of them. Especially the lunch and dinner ones. The only reservation I have about giving 5 stars are the sweet breakfast recipes. This book is a nutritional guide that can be of great help to crank up our burning furnace and puts our body in the ultimate metabolic state.

I haven't had this book for very long so haven't had time to try very many recipes however, the ones I've tried have been excellent recipes. I'm feeling healthy without sacrificing my love for food. And also it is much delicious than what I cook last time. I will continue cooking foods with the recipes from this cookbook. Thumbs up!

The recipes book is worth buying. Gives yummy. Smoothies as well as educates. Healthy beginnings with good and great tasting foods. I also want to try some of the recipes in this book that is new to me. Worthy!

I love how the book was written, I am actually looking for this since last year now i have found it I am really grateful that i was able to explore a lot of things from this book especially the quick low carb recipes. I love how these recipes are truly low carb and diabetic friendly. So many times, recipes claiming to be low carb, or for diabetics, end up having way too many carbs. Another plus, the author includes nutritional information for each recipe. Knowing the carb count is extremely important for anyone counting carbs. It's also realistic and has been easy to stick with.

I love how these recipes are truly low carb and diabetic friendly. So many times, recipes claiming to be low carb, or for diabetics, end up having way too many carbs. Thanks author for creating us a new very informative book for all of us.
