Book Of Astronomy And Space (Internet-Linked Reference Books)

Synopsis

This is a superb introduction to the universe, with breathtaking surface-eye views of the planets and wonderful deep space images of stars. It gives a planet by planet guide to the solar system, 20 pages of star maps plus a guide to famous and easy to spot stars, nebulae, galaxies and meteor showers. It includes practical information on star-watching, home astronomy and using a telescope or binoculars. It also includes internet links to recommended websites with the latest space information, and fabulous images from the Hubble Space Telescope.

Customer Reviews

My 10 year grandson and I have loads of fun with this book as we look into space together, esp. since I got him a telescope for Christmas!

The Children are learning a lot about astronomy and space this year and this book will provide hours of enjoyment for them.
