Customer Reviews

The experts at The Princeton Review have been helping students, parents, and educators achieve the best results at every stage of the education process since 1981. The Princeton Review has helped millions succeed on standardized tests, and provides expert advice and instruction to help parents, teachers, students, and schools navigate the complexities of school admission. In addition to classroom courses in over 40 states and 20 countries, The Princeton Review also offers online and school-based courses, one-to-one and small-group tutoring as well as online services in both admission counseling and academic homework help.

The best book for SAT prep

Good

Good

Really good book for help to pass test.

I have used this book to tutor students on the math part of the SAT, but I find this part lacking in depth. If you are a student who is trying to get a high score on the SAT, this book is not challenging enough and will not help you move your score to the high percentiles. There are companies out there that put together SAT preparation material way more challenging than this. Having said this, if you can not afford to pay for private tutoring, and/or are not aiming at a particularly high score, this book may be just fine.

My younger sister is preparing for the 7th grade Duke TIP sponsored SAT. The first practice test in this book, she scored a 510 on the math portion and a 540 on the reading portion. Needless to say, these scores were not exactly satisfactory. However, this workbook provides very detailed explanations and lessons in the back of the book. Function notations, trig identities, and other core SAT math subjects were all thoroughly explained in the book. It will show the most common mistakes people make when answering certain problems and give tips on how to improve on their mistakes. What surprised me was how well they can hammer critical reading skills into oneself through their guides and walk-throughs. Needless to say, by the third practice test, her math score increased by 100 points and her reading by 50! Although increasing her score from a low 500 was

fairly easy to do the learning curve only creeping at the higher percentiles, I have faith that she will continue to improve her score throughout this year!

Purchased for step-daughter. It worked for what she needed
