# Bali Modern: The Art Of Tropical Living

## Synopsis

Blending modern, chic designs with traditional sensibilities, the architecture and decor of Bali is the gold standard for tropical living. A thatched Balinese bale, overlooking a panorama of rice fields and open to the evening breeze, or a courtyard that combines temple carving with relaxing, recreational lounging space are enduring features of a distinctive "Bali-style". Shimmering pavilions, open verandahs, living rooms that invite the outside landscaping in—all are part of the Balinese tropical living experience. This book focuses on these timeless features and shows the new and exciting ways in which they are being interpreted. All the contemporary villas, resort bungalows, shops, restaurants and other buildings in the book, most never photographed before are new additions to the Bali scene. Each is unique, and, most importantly, characterized by a distinctly modern feel. Cleaner lines, more imaginative use of space, sharp angles, and the use of stone, concrete and ceramic roof tiles, are increasingly visible along with the coconut wood, teak and thatching. Stunning color photographs depict the residences set within their natural landscapes; architectural details; and a stunning array of individual interiors. Meticulous text compiled by an expert in tropical design, relates the various stages of the development of this new, international style, and complements the fascinating array of interiors featured.

Gianni Francione is an architect from Turin, North Italy, who has lived in Bali for over 20 years. He is inspired by tribal art and the vernacular architectural tradition of Indonesia, and has designed countless tropical homes.

good

As an architect working on beach resort/house. This is a great reference book for architectural images.

Bali Modern turns out to be a great selection to add to the coffee table after one has visited Bali. Reminiscing from afar reminds me of the memories from a special trip.

Nice pictures, interesting, not stellar...

I like the fact that the homes are a blend of the old and new!

Many westerners have set up homes in Bali, which have long been a magnet for western culture-hound. Here, writer and photographer showcase what the island's most inspiring examples of contemporary residences, shops, restaurants and of course the beautiful resorts that Bali is renowned. The work is well researched, featuring architectural and interior detailing of cross cultural legacy and an amalgamation of both modern and traditional. The text includes little stories of origins and legends. And as always, Lucca Invernizzi Tettoni's superb photography, mostly outdoor shots of the creme de la creme of Bali's private and resort landscaped gardens. This work captured all parts of the Balinese tropical living experience, proving why Bali is often remembered as the place to rejuvenate the soul.

Wonderful book Great price...I was at Denpasar Airport and the book was over \$60 Au so I waited till I got home and bought it from you. I want to build a Bali House in the Tropics where I live so this book will be very helpful.

This is just what the doctor ordered for enthusiasts of tropical decor and culture. By focusing on the use of modern (alibet, longer lasting) building materials with techniques designed to provide a tropical ambiance is neat. It's not something that I have found elsewhere. It would also be nice to provide some interior decorating schemes to be translated into the American shopping market using or importing accessories from the Bali region or using alternative sources for the "tropical" look from other areas, i. e., the British West Indies, the Caribbean, major U.S. catalogues, etc. Thanks for the

opportunity to comment.
