## Customer Reviews

I had to get this book for a Computer Applications for Law class in my paralegal program. Already being technologically savvy, I really didn't need to take this course, but being how it counts towards one of the ten courses needed to get my certificate, I decided to take it for an easy A. My major complaint with the book is the price and the lack of color photos. The only color used in this book is blue for the chapter headings. You would think that for the \$100 this book costs new (as of 12/23/2013), they would fill up the pictures in color (especially the parts where they discuss software tutorials). Other than that, the content of the book is OK at best. Do yourself a favor and buy it used. If you pay the high price for it new, you're really shooting yourself in the foot. After my semester ended, I sold this book back to for a \$54 gift card, which isn't bad at all considering I paid \$65 for it used.

i needed this book for a class but decide to rent the book instead of using the kindle version. This book is well written and the subject matter is complete but it is written for someone who has almost zero knowledge of how a law office operates, including things like how much memory you should have in a computer to have it function well for the office. It is written for a level that is lower then something i would need to reference in the future so i decided to return the book and rent instead.

It's a course-required book, so I had to get it. Since its more of a introductory type of class I decided to rent it instead. It's pretty easy to read and has a great deal of up to date information in the legal industry. Technology has definitely evolved for the legal industry and it's only going to get better and more advance.

Useful book - timely delivery.

arrived on time. its a textbook, what more can I say? except I dont think I opened the book a single

time for the semester, but that is because the professor did not make lesson plans from the text

This was my first time ordering my textbooks online. I always bought them in the college bookstore. I will no longer do that. I ordered Technology in the Law Office (2nd edition) on May 8th, 2012. I was told I would receive it by May 31st. I actually received it within 5 business days. I ordered it new and it was everything it said it was. I saved at least over \$100 by ordering this textbook and another by going through ! I will never over pay again for textbooks and will always come to for them.

Excellent!!

An excellent introduction whether you're brushing up or completely new to the technology. A great overview in tips for such as programs Microsoft Office, Excel, etc. As well a basic overview of e-filing.
