Customer Reviews

Author Don Gentile has been an avid waterman and an amateur meteorologist his entire life. He taught earth science and math at South Kingstown High School for nearly thirty years. He is happy to share his thoughts on the wonderful science of swell prediction for Rhode Island.

Let me start by saying this book provides incredible insight for predicting surf in RI. I have been surfing for close to 10 years in RI and have always relied on the internet for surf forecasts along with driving to the beach every day to check the waves. I recieved this book for Christmas 2010 and it instantly provided me with the knowledge to predict the local waves. The majority of well known surf spots in RI are accuratly analyzed. This book contains only useful information and contains minimal BS. A competent person will be semi-accurately predicting waves in 24 hours. Buy it!
