# National Geographic Readers: Deadliest Animals

## **Synopsis**

Did you know that a tiny golf ball-sized creature called the blue-ringed octopus contains enough venom to kill 26 adult humans? Or why the Sydney funnel web spider is one of the most dangerous creatures in the world? In this Level 3 book, kids will be fascinated by 12 species that you hope you'll never come across! Sharks, snakes, jellyfish and more—these creatures are among the most threatening—and interesting—in the world! National Geographic supports K-12 educators with ELA Common Core Resources. Visit [www.natgeoed.org/commoncore](http://www.natgeoed.org/commoncore) for more information.

## **Customer Reviews**

MELISSA STEWART is the owner of Honeybee Productions, an editorial services company, and has written many celebrated nonfiction books for children. For National Geographic Readers—Melissa has written Ants, Snakes, and Dolphins.

I enjoy my Grandson's homework reading and this book along with other National Geographic books are great. He picks out weekly which one he would like to read out loud. He loves science

and learning about the world so these books are perfect, they even have silly jokes. This one is about animals that are known to be killers but what we are learning is that is not necessarily the case but the nature of the world. I recommend all the NG books

My seven year old daughter loves to read and reread this book.

great

niece really loves these books

love it

loved it

:)

I bought this for my eight-year old grand son for his birthday. Like me, he loves animals and easily retains interesting facts about animals that he shares with everyone who will listen, and it is amazing how much he has learned just by reading. I bought this book mainly because I want to instill in him a love for animals that stays with him throughout his life. I chose this book because I knew Nat Geo is famous for their photography and this book did not disappoint in that respect, and it was easy enough for my grand son to read, and I thought he would like it. He did. His mom did too, to an extent. She has arachnophobia and she did not like the photo of the Sydney Funnel Web spider, not that I blamed her. Though not severely suffering as she with arachnophobia, the photo even gave me the creeps!!! Despite the nasty eight-legged beast, the book was great and my grand son loves it! Great seller too, by the way! Thank you very much!
