Roger Priddy left school at 16 with just one qualification – in art. He went to Berkshire College of Art and Design and trained as an illustrator. His first job in children's books was working with the publisher Peter Usborne, at Usborne Publishing, and then he worked with Peter Kindersley at Dorling Kindersley, where he spent 16 years. Priddy became Creative Director of DK's Children's Division and was Managing Director of the children's mass market publisher Funfax when it was acquired by DK. In 2000, he created Priddy Books with John Sargent at St Martin's Press to create innovative and imaginative titles for children, from first books for babies through early reference titles for older children. Since then, over 30 million copies of Roger's 200 plus books have sold worldwide, with five of his books – My Big Animal, My Big Truck, Happy Baby Words, Happy Baby Colors and Puppy and Friends – each selling over one million copies. He is also the author of Big Board First 100 Words; Big Board Books Colors, ABC, Numbers; and Bright Baby Noisy Monsters. His creativity has been recognized with numerous industry awards. Priddy lives in

London with his wife Zena and their four children.

My son and I love this wipe clean workbook!! A friend of mine shared a video of her daughter using this workbook. Before seeing that video, I never knew that any thing like this even existed!! I really wanted something reusable, as we practice to get my son ready for preschool. Something to help him practice his tracing, pen control and writing. This product has exceeded my expectations 100000%! I love the fact that you can easily wipe this clean. I use a damp paper towel to ensure it is completely clean. I always make sure to clean it after we use it. I recommend doing this so that it doesn't stain. There are so many different things for the kids to trace in this book! All sorts of lines and images. My son LOVES the dog and cat tracing! They have so many different books, I look forward to purchasing more. Now we can practice and make it fun! This is one purchase I am exceedingly happy about! I highly recommend this for your preschool aged child!

I bought a few of these books in the same series for my son and daycare kids to get a jumpstart on writing. My 2 year old, who is fairly intelligent, doesn't really grasp the concept of following the dotted tracing lines, and instead prefers to 'color the kitty's eyes' or color in the pictures. My 3 year old loves it though, and immediately understood that we start our marker on the big purple dot, then follow the dotted lines. Within minutes she was doing all sorts of pen control exercises that I didn't know she could do! It really helped her learn the most comfortable way to hold the marker and be able to control it the most, which quickly led to her being able to write her whole name!!! While my son isn't using the book for its sole purpose, he's still learning things, and I know he'll grow into it. I've found that Expo low-odor dry erase markers work best with kids in these books, but make sure you erase the pages everyday!! We made the mistake of leaving the writing in the book for a couple days, and it stained the pages a bit.

My daughter loves to practice tracing in this book! I did buy some additional dry erase markers, since they can dry out pretty fast. I will say, if not wiped off right away, it becomes a real bugger to clean. I ended up putting some rubbing alcohol on a rag and it wiped right off. This book has definitely helped my daughter with control when writing and has helped teach her how to make shapes. She's still a bit wobbly with it, but practice makes perfect! I love that it's reusable too, so we aren't wasting a bunch of paper. Highly recommend.

I think this book is fantastic for any young child, whether just starting to write or working on their pen

control. I remember doing books like this when I was young, and when I saw this I bought this for the 3 1/2 year old I nanny. I think this book is perfect for his age, and will "grow" with him for a while. I like that there are a variety of pages in the book; it starts with just tracing lines, goes to shapes, then a little more complex pictures (a teddy bear, drum, etc) and the last few pages are whole (simple) scenes with a blank page in the back to draw whatever you like. This book is great because your child can just draw on it if he isn't at the point of tracing and work his way up to it. Of course the fact that you can erase and do it over and over is very appealing. The only negative is it only comes with one black pen which may not be as much fun for younger children, but it is very easy to buy more markers, and they even make dry erase crayons now! (Any dry erase crayons or markers appear to work. I noticed the red crayon doesn't come off as easily, but a little water or even windex works great to get the traces off)

Purchased this book for my son who is 4.5 years old to help with pen control/fine motor skills. The pages are big and the directions of how to trace are easy enough for him to follow. He loves it and in less than two weeks we have already noticed an improvement in his ability to hold the marker and trace the lines smoothly. The pages erase easily. My only complaint would be that this did not come with an eraser which works better than a cloth, in my opinion. Luckily we already had several other dry erase markers with erasers attached so my son has just been using those. It would also have been nice if the book had some way to attach the marker to it so that you could keep them together. Otherwise, I totally recommend it and will be buying other products from this company.

I bought this book for my 2.5 year old to and she loves it. There are colorful illustrations and easy to follow activities. At first, she just scribbled all over the pages when I first introduced them to her in the car while running errands one day. Now we work on them together and I am seeing an improvement in her skills. The book has nice illustrations and is colorful. She can turn the page to a different activity if she gets bored. When I first gave her the book, I let her use the pen that came with it because I thought it would work like a regular dry erase marker but that was not the case. I tried to wipe away the marker with a paper towel but I couldn't get it off and ended up smearing it on the pages. My daughter got marker all over her hands just by resting her hand on one page while working on another. She touched her face and shirt, so the marker was all over those as well. I later tried using a baby wipe and that just smeared it even more and also got it on my fingers. I had to used a couple of baby wipes to completely clear off the marker from two pages and wash my hands several times because they were stained. I bought the crayola dry erase crayons and those do wipe

off easily with the included cloth.
