Customer Reviews

This is yet another excellent installment in the crash dive series. In this novel, the protagonist is disappointed when he finds out that he will make one more cruise as executive officer before being

posted to captain of his own submarine. This ends up presenting a host of problems which will be familiar to many readers of Naval military fiction. Like all of the novels of the series, this story is extremely realistic and the author plainly knows his subject. I enjoyed this one a great deal. This is one of the best series around dealing with summering warfare in World War II. I will be eagerly what awaiting the next installment. RJB.

I'm hooked on Craig DiLouies' series. In this fourth installment our protagonist is, once again, put into harms way. To enjoy this book you have to read all of the novels in order for the most enjoyment. Easy to read, not "tech" complicated and a darn good story. Oh there are some parts that are a bit over the top of improbable but they are enjoyable.

Love Mr. DiLouie's stories. They keep me wanting to stay up too late at night. Am looking forward to future adventures in this series!

Riveting. I can't wait for his next book. This series thus far has been a great read. Very realistic in details regarding submarines.

A credible account of a not-so distant period of history which should be a satisfying read for those who prefer historical fiction.

Great read as a series look forward to seeing the next book. Plot line and characters hold interest . Hard to put the story aside.

Good story although fairly short. That may be the writer's plan, though, since the price is low and the stories have clear beginnings and ends. Good writing and submarine knowledge, also.

This book is part of an excellent series. World War II was tough, but never tougher than in a submarine. An excellent read.
