Dr Alan W. Meerow was the former Professor and Palm and Tropical Ornamentals Specialist at the University of Florida's Fort Lauderdale Research & Education Center. He currently works as a geneticist for the Agricultural Research Service, and is a research collaborator at Fairchild Tropical Garden. He received his B.S. degree in botany and environmental horticulture from the University of California at Davis and his M.S. and Ph.D from the University of Florida in horticultural science and botany. Dr. Meerow originated and taught the course Palm Production and Culture for many years in the University's Ft. Lauderdale Degree Program in Environmental Horticulture, and currently conducts research in various aspects of tropical horticulture and botany. He has been recognized by the Florida Nursery, Growers and Landscape Association as Horticultural Writer of the Year in 1990, and Educator of the Year in 1991. Dr. Meerow is an internationally recognized authority on the *amaryllis* family and has published numerous scientific papers on the taxonomy of that group. He has published over 200 scientific, extension, trade and popular magazine articles on plants. He is the author of Betrock's Guide to Landscape Palms, and with Timothy K.

Broschat, Betrock's Reference Guide to Florida Landscape Plants, and Ornamental Palm Horticulture.

Very comprehensive and reliable information for anyone wanting to add cold hard palms to their landscape. Since buying this book I have planted five different varieties of palms included in this book and found the information very accurate and helpful.

Great pictures and good info but could have used more detail.

A great book! Very informative.

Betrock's Cold Hardy Palms is a wonderful guide for choosing cold hardy palms in your landscape. This book has a lot of information on each species covered, and plenty of large photographs of the leaves, fruit, flowers and the trees themselves. This book and David Franko's book, Palms won't grow here and other Myths are very informative.

I live in Italy and in my country there is not a book who could give so many names of potential Palms to try to cultivate in cold or temperate climate. Interesting is the min temperature that any Palms could stand and there are many photos. In few words...a very helpful book to buy. Raffael Venice Italy

A great book for those beginning / or thinking to grow palms in a colder climate. Easier and better than scanning the internet for ideas. A good reference to a great many palms. A Christmas pressy that won't be up on E-bay later.
